

Young Actuaries Program

Building Leadership for Business Impact

Presented by: Andrew Brown

Thursday 16 February 2012

5.30pm - 8.00 pm

AXA Auditorium, Ground Floor, 750 Collins Street, Docklands, Melbourne

The traditional notions of leadership have us imagine the fearless CEO or Chief Actuary riding into battle on his white stallion, directing the troops and calling out orders. While this leadership model may have worked in the times of Henry Ford, the global systems and day to day complexity we operate in calls for distribution of leadership across the organisations and teams we work in.

In this thought-provoking workshop, Andrew will share his experiences in developing leaders, present recent research on the evolving nature of leadership, and:

- discuss why leadership is a personal orientation and mindset rather than a position of authority;
- explain the different aspects of leadership, including emotional intelligence and systems intelligence;
- discuss how leadership relates to each stage of your actuarial career; and
- provide practical guidelines on how you can develop your leadership capabilities.

Andrew Brown

Andrew partners with clients in building effective leadership cultures, through developing leadership capacity at the individual, team and organisational level.
