Institute of Actuaries of Australia

Modelling Claim Development Processes

Bo Wang

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Outline

- Open Claims vs. Closed Claims
- Claims Development
- Models
- Results on CTP Industry Data
- Discussions
- Questions

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Open Claims

- **Pricing**
 - Open claims provide an incomplete view, estimates may not be central
 - Long tail products especially affected
- **Solutions**
 - Discard claims?
 - Discard accident periods?
 - Use Valuation – aggregated ultimate-to-case ratios

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Claims Development

- Causes of change
 - New information about the claim
 - New claims environment
- From the new set of information
 - Revised view of claims cost
 - New case estimate
- Number of changes vs. Real time?

Institute of Actuaries of Australia

16th General Insurance Seminar

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolom

Sample Path 1

Institute of Actuaries of Australia

16th General Insurance Seminar

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolom

Sample Path 2

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Component Processes

- The complete claims development process broken up
- Individual revisions
 - Delay since last revision
 - Claim settled or not
 - Direction of movement
 - Size of movement

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Time Measurement

- Use number of changes
 - Can account for changes in finalisation
 - PPCF in operational time
 - Changes in claim profile?
- Modelling perspective: using number of changes guarantees a change

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

DATA

- **NSW CTP Industry data**
 - 7.5 years of data since accident year 2000
 - MACA
 - 70,000 claims, 60,000 finalised
 - 200,000 changes

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Delay Process

- Time measured from last revision
- Choice of continuous or discrete distributions
- Provide information on other processes
- CTP Data – Negative Binomial fits well

Institute of Actuaries of Australia

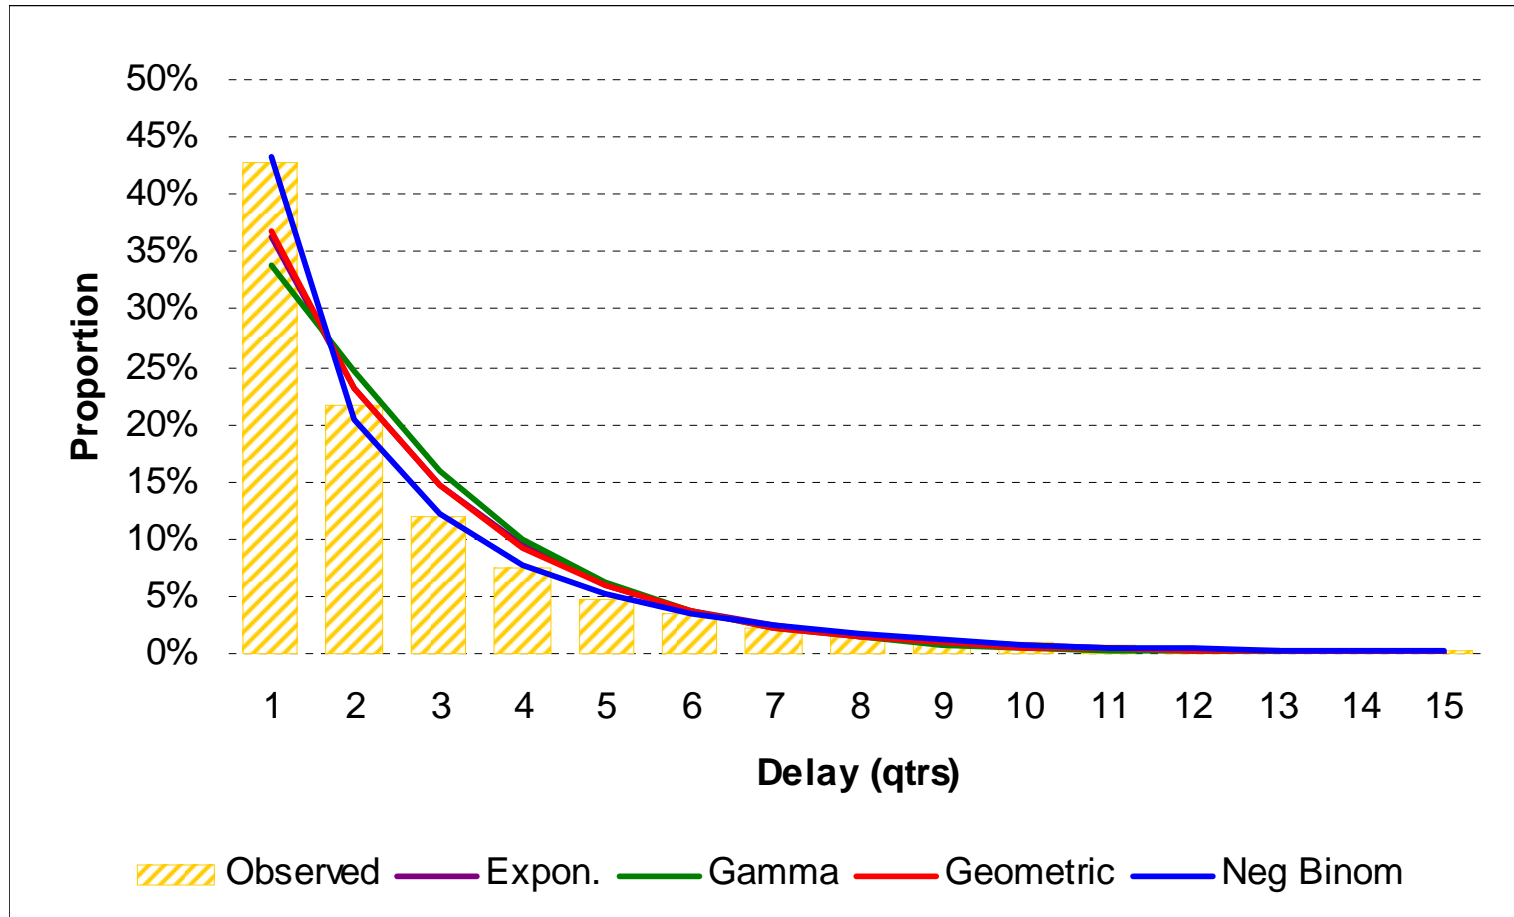

16th General Insurance Seminar

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Delay Process, CTP Data

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Claim Status

- Model number of revisions?
 - Cannot account for changing characteristics
- Binary variable to flag status of claim
 - Probability of finalisation is modelled
- If probability is constant, then the number of changes follows a Geometric distribution

Institute of Actuaries of Australia

16th General Insurance Seminar

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolom

Number of Revisions, CTP Data

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Direction of Change

- **Modelling Direction and Size separately**
 - Up and down movements behave differently
- **Direction is modelled as a binary variable**
 - Probability of an upward movement is modelled

Institute of Actuaries of Australia

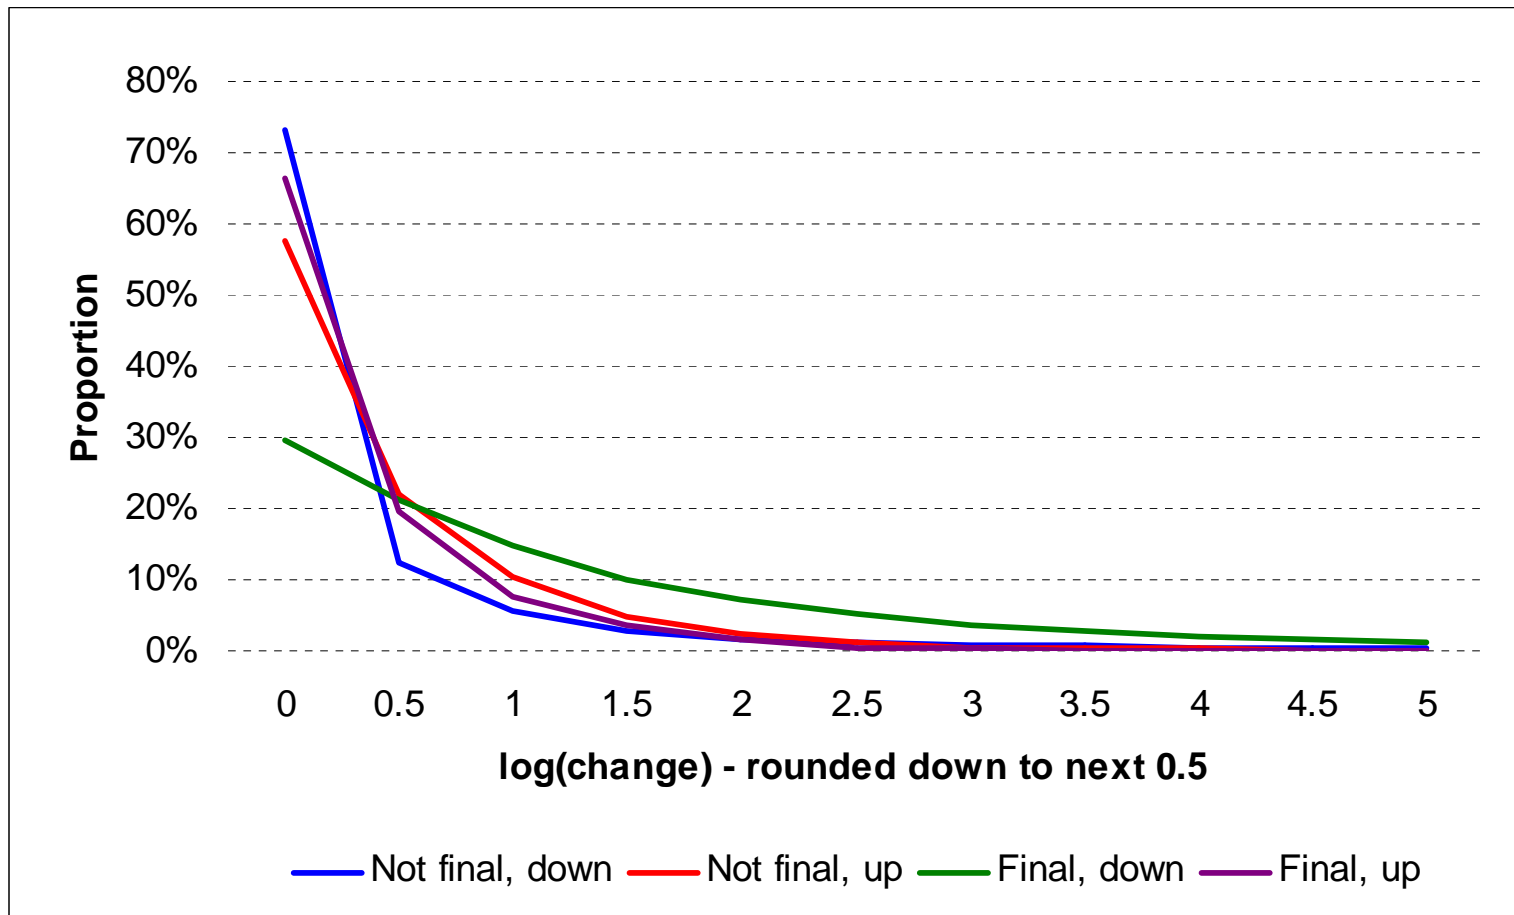

16th General Insurance Seminar

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Size of Change, by Direction and Status

Institute of Actuaries of Australia

16th General Insurance Seminar

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolom

Direction of Change

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Size of Change

- $\text{abs}(\log(\text{New Claims Cost}/\text{Old Claims Cost}))$
- Many distributions to chose from
 - Lognormal
 - Gamma
 - Generalised Gamma

Institute of Actuaries of Australia

16th General Insurance Seminar

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Size of Change, Savings on Finalisation

Institute of Actuaries of Australia

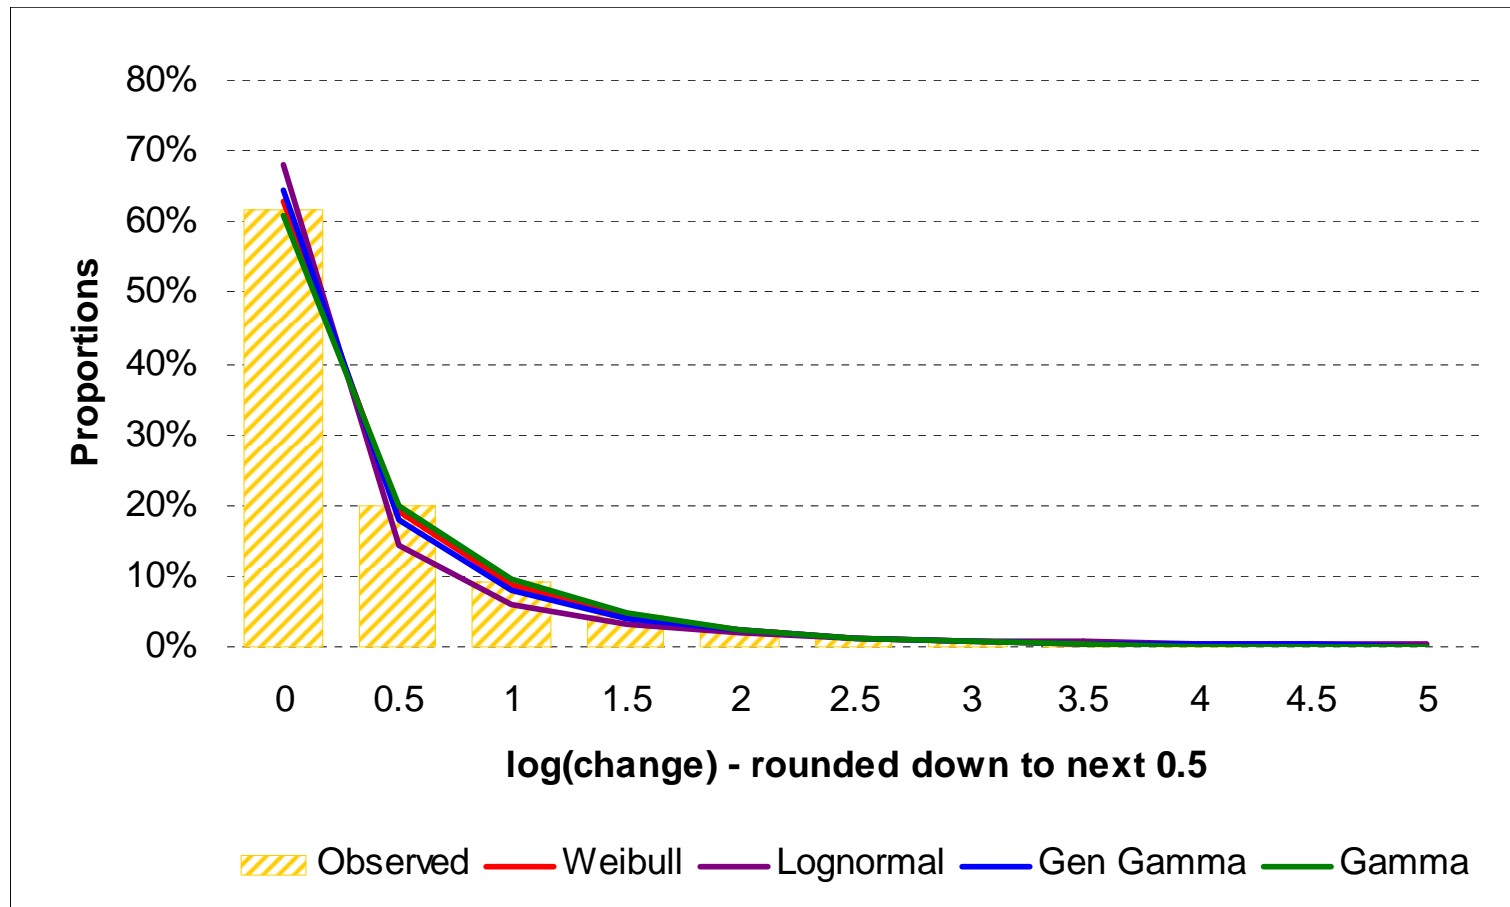

16th General Insurance Seminar

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Size of Change, Other Changes

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Modelling

- **Modelling Hierarchy**
 1. Delay (only using information from last revision)
 2. Claim Status
 3. Direction of change
 4. Size of change
- **GLM framework**
 - Familiar grounds
 - Log links used, coefficients are easy to interpret

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Variables

- **Process Variables**
 - Delay
 - Size of claim
 - Previous Change
- **Static Variables**
 - Age at Accident
 - Gender
 - Location (vehicle)
- **Dynamic Variables**

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolom

Dynamic Variables

- Variables that change value over the lifetime of the claim
 - Liability status
 - Legal representation/Litigation status
 - Injury severity
- More interesting
 - Current level, or
 - Changes in value

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coozum

Dynamic Variables

- **Easy to Model**
 - Use as covariates in the GLM process
- **Difficult to use to Predict**
 - Predictive Model need to predict future values of dynamic variable
 - Ignore?
 - Condense many in one variable?
 - Survival Analyses?
 - Take a snapshot?

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Software

- Specifying likelihood and maximising it is preferred
 - S-PLUS cannot handle dataset size
 - SAS 9.1 cannot handle programming
- SAS GLM used
 - Approximate for Delay process
- SAS 9.2 to contain programming functionality

Institute of Actuaries of Australia

16th
**General
Insurance
Seminar**

Thriving on Change

9-12th Nov 2008
Hyatt Regency Coolum

Results

- Industry wide results
 - Do not apply to particular insurer
- Main effects only

Institute of Actuaries of Australia

16th General Insurance Seminar

Thriving on Change

9-12th Nov 2008
